COURSE DESCRIPTION

This course reviews the anatomy, physiology and pathology of the female reproductive system from a Western perspective as well as the TCM paradigm. Students will learn to diagnose, differentiate and develop treatment plans for general gynecological disorders and to use correct treatment strategies, with instruction in the acupuncture and Oriental Medicine specialty of Gynecology, to treat a range of gynecological disorders.

LEARNING OBJECTIVES

Upon completion of this course, the Students will learn the clinical aspects of TCM gynecological care. The students will obtain the fundamental understanding of western medicine clinical aspects.
